

the new standard
in server technology

Model EEB

General

Model EEB is the 2nd generation ECOserver specially designed for IP security and embedded applications. The chassis offers flexible mounting options and offers a wide choice of internal components so as to meet your application needs exactly.

Specific properties

ECOserver model EEB is a 2U 19" rack mounted server that can alternatively be screwed to a wall, or to appropriate furniture. It comes with an AC 230V power supply. The excellent cooling (there is one 80mm fan fitted as standard and a second fan can be specified as an option) is sufficient to accommodate processors up to Intel® Core® i7 and Intel® XEON® CPUs. EcoServer model EEB has a spare slot, so an additional card can be added for extra functionality, and it is also possible to add an extra I/O card.

Target group

The EEB is ideal for numerous applications such as:

- IP Security;
- Access Control;
- Machine Control;
- PABX / Asterisk phone server.
