

the new standard  
in server technology

# Model EIM

## General

Model EIM is a universal 4U-high 19-inch server that combines five properties:

- energy efficient, only 45W;
- compact, depth only 40 cm;
- low noise level.

## Specific properties

Model EIM is equipped with the latest generation Intel® server motherboards with energy saving processors from the Intel® XEON® range. It can contain two processors and is provided with an IPMI service processor to monitor and manage vital server functions. The 4U 19 inch chassis can contain up to 8 HDD, SAS and/or SATA so a high internal storage capacity is available. On average it consumes 45 Watt so substantial savings can be made on energy costs. Model EIM is available in several versions. Up to 7 cards, PCI or PCI-e, can be placed at the back of the server. The front panel can be delivered in the color black (with or without CD/DVD access) or white (with CD/DVD access).

## Target group

Model EIM is ideal for numerous applications such as:

- Small Business Server;
- virtualization server;
- high end security projects.
